Biography

I had hardly learnt to walk and before I knew it I was on cross-country skis; by the 2nd year of school I already wanted to become a cross-country skier or a federal councillor. I didn't know anything about biathlon yet. For me, the winter weekend cross-country races were the highlights.

Having grown up on a small organic mountain farm in Isola between Sils and Maloja, I had an exciting route to school which I took by bike, cross-country skis or on foot. I often got the fast farmyard dog to pull me to kindergarten across frozen Lake Sils, and this is how I learned to love the pace.

I gladly helped out on the farm and looked after our goats high up below the Piz La Margna and helped with mountain haymaking or cheese production. I also did classical ballet for a long time and played the violin for several years. All of this formed the basis for my success today. When I was 17, I switched to biathlon.

Fortunately, I found school relatively easy. At the age of 19, I reached my intermediate goal, the Swiss baccalaureate (Matura). Full of determination, I went into top-class sport basic military training and when I was only 20, I started training as a border guard.

I made a convincing impression at the Olympic Games in South Korea with 2 diplomas and 2 top 30 rankings. At the World Championships in Pokljuka (SLO) in 2021, I earned 8th place in the individual and 9th place in the single-mixed relay. I qualified for my third Olympic Games in Beijing in 2022. The diploma for 8th place in the relay at my first Olympic Games in Sochi (2014), which was sent retrospectively in 2022, was a positive sign after the collapse at the Beijing Games. I had to skip the 2022/23 season for health reasons.
